

SISSA
40!

PhD Program in Functional and Structural Genomics

First Year Courses – November 2020 /
January 2021

Monday 30 November 2020

09:00-11:00 Structure of RNA

Tuesday 1 December 2020

09:00-11:00 Structure of RNA

Wednesday 2 December 2020

09:00-11:00 Structure of RNA

11:00-13:00 Engineering the mammalian genome

Friday 4 December 2020

11:00-13:00 Engineering the mammalian genome

Wednesday 9 December 2020

11:00-13:00 Engineering the mammalian genome

16:00-18:00 Neurobiology of Diseases

Thursday 10 December 2020

16:00-18:00 Neurobiology of Diseases

Friday 11 December 2020

11:00-13:00 Engineering the mammalian genome

16:00-18:00 Neurobiology of Diseases

Monday 14 December 2020

16:00-18:00 Neurobiology of Diseases

Tuesday 15 December 2020

16:00-18:00 Neurobiology of Diseases

Wednesday 16 December 2020

11:00-13:00 Engineering the mammalian genome

16:00-18:00 Neurobiology of Diseases

Thursday 17 December 2020

16:00-18:00 Neurobiology of Diseases

Friday 18 December 2020

11:00-13:00 Engineering the mammalian genome

16:00-18:00 Neurobiology of Diseases

Wednesday 13 January 2021

16:00-18:00 Engineering the mammalian genome

Friday 15 January 2021

16:00-18:00 Engineering the mammalian genome

Wednesday 20 January 2021

16:00-18:00 Engineering the mammalian genome

Friday 22 January 2021

16:00-18:00 Engineering the mammalian genome

Tuesday 26 January 2021

16:00-18:00 Engineering the mammalian genome

Friday 29 January 2021

16:00-18:00 Engineering the mammalian genome

Professors

Antonello Mallamaci

Engineering the mammalian genome

Giuseppe Legname

Neurobiology of Diseases

Giovanni Bussi

Structure of RNA

Courses will be held remotely

These courses are mandatory for students enrolled in the first year of the PhD in Functional and Structural Genomics. Other interested students should send an email to remo.sanges@gmail.com indicating the name of their PhD program, their supervisor, the title of their research and the name of the course of interest.
